

A message from Frank V. Sacco, FACHE, President and Chief Executive Officer

Good day,

Obstetricians are known for making special deliveries – sometimes in most unusual circumstances.

This Memorial physician transported Patient First care to a new level.

Thank you,

Recently, Faris Hanna, MD, encouraged an expectant mother to make an appointment to have her labor and delivery induced. Dr. Hanna had delivered her other children and felt this was best, but the patient declined.

Not long after, the patient called Dr. Hanna's office from her cell phone. She was in labor – in the Memorial Regional Hospital visitor parking garage.

Dr. Hanna wasted no time. He left his office, located a wheelchair, searched the parking garage, found the patient and personally transported her into Labor and Delivery. Within minutes, the baby was born.

Mother and baby are doing fine – thanks to Dr. Hanna.

Department leaders please post this for all employees who do not have access to email.
