

What is the Advisory Board?

So everyone has begun to hear more and more about Patient and Family Centered Care. Everyone knows this is a new philosophy of collaboration and participation; all about information and respect. So, what is this about an advisory board?

MCI has recently recruited an amazing group of patients and families to participate as advisors. They formally meet once a month and they are the advisory board.

This group of patients and families are those who have used one of the MCI facilities. They are donating their time and energy to work with us on improving services.

This amazing group of individuals have begun to learn all about how MCI currently works. They are energized and have wonderful ideas.

Over the coming months they will be requesting various staff to come and talk with them so that they can obtain a better understanding of how we operate and what your experiences are.

Their goal is to work with us and create the best cancer institute ever.

Should you wish to be a part of the advisory board please RSVP for one of their up-coming meetings.

Stop by and see what the meetings are like. The board will be asking for liaisons between them and MCI as they grow.

All Patient and Family Advisory Council meetings are held on the first Thursday of the month from 5:30pm to 7:00pm at Memorial Hospital Pembroke room 366.

RSVP to Katharine Campbell (West x9712) or Bettye Bradshaw (Regional x5768).

Meet The Advisors

Here are just a few of the advisors we have working so hard for Memorial Cancer Institute.

← Here is Natalie Sands; she is our co-secretary!

Here is Lilly Grant; she → is our vice-chair!

Core Principles:

- Dignity & Respect
- Information Sharing
- Participation
- Collaboration
